

ROCK VALLEY OIL AND CHEMICAL

WATER BASED METALWORKING FLUIDS

Viscool Coolants

Rock Valley Oil's line of Soluble, Semi-Synthetic, and Full Synthetic Coolants for the machining and grinding of metals. Viscool Coolants provide excellent lubrication, cooling, bio-resistance and corrosion protection.

Product	Type	Severity	Concentration	Multi- Metal Safe	Hard Water
<p style="text-align: center;">Viscool 5126</p> <p>World Class non-chlorinated economical soluble oil. Excellent emulsion stability, including hard water applications. Recommended for a broad range of applications.</p>	Soluble Oil	Light to Moderate	4-8%	Yes	Good
<p style="text-align: center;">Viscool 5626</p> <p>World Class soluble oil containing chlorinated paraffin. Good EP properties. Recommended for more severe operations.</p>	Soluble Oil	Moderate to Heavy	4-8%	No	Good
<p style="text-align: center;">Viscool 6425</p> <p>World Class non-chlorinated economical coolant for light to moderate duty applications. Excellent for hard water applications. Excellent bio-resistance without dermatitis.</p>	Semi-Synthetic	Light to Moderate	5-10%	Yes	Excellent
<p style="text-align: center;">Viscool 6435</p> <p>World Class non-chlorinated coolant for moderate to heavy duty applications. Excellent for hard water applications. Excellent bio-resistance without dermatitis.</p>	Semi-Synthetic	Moderate to Heavy	4-8%	Yes	Excellent
